

# Dog Walking Readiness Check

A short readiness check to support clear planning for your dog's daily care

- Your dog is often left alone for 7–8 hours at a time
  
- Your dog shows restlessness, pacing, or over-excitement when you get home
  
- You end up stuck in meetings, traffic, or working late
  
- You find yourself unable to provide walks at a consistent time
  
- Your dog shows early signs of resource guarding or destructive behavior
  
- Your dog requires steady, confident handling on walks

If any of these feel like your dog or situation, dog walking support is worth considering.
